Davis City Council:

I am writing to urge you to support Stop West Nile Spraying Now's proposal for the City of Davis to opt out of widespread West Nile spraying over urban and environmentally sensitive areas.

My concerns include the unproven effectiveness of the spray and its potential to exacerbate the situation, in addition to the cumulative and synergistic exposure of residents to toxins known to have potentially serious health implications.

In place of widespread spraying I urge the City to invest in comprehensive public outreach and education efforts as a more effective means of protecting its residents' health and well-being.

Thank you for your concern about this issue and I look forward to your support of Organic Sacramento's and Stop West Nile Spraying Now's opt-out resolution.

Sincerely,
